

# RestoreX<sup>®</sup>

Next Generation Penile Traction Therapy Device

An easy-to-use solution to maintain penile length after prostatectomy

Proven results in 2, 30-minute treatments per day<sup>(1)</sup>

- Developed in cooperation with Mayo Clinic
- Results in just 2, 30-minute treatments per day for 5 months
  - Start treatment sessions 1 month after surgery
  - On average, men using RestoreX gained 2cm in length
  - Erectile function only declined 4 points while men that did not use RestoreX (control group) lost 8 points, on average, due to their surgery
  - 83% of men indicated the treatment was meaningful and worthwhile
  - No long-term complications were associated with RestoreX treatment
  - Study results can be reviewed in full at [www.RestoreX.com](http://www.RestoreX.com), clinical results
- Invented by a Urologist specializing in Men's Sexual Health
- Patented technologies including Optimized Traction Zone
- Designed, manufactured and serviced in the USA
- 12-month limited warranty
